

Dear Business Partner,

We would like to thank you for taking an opportunity to introduce our machinery factories located at the cities of Afyon, Ankara, Eskişehir, Erzincan and Turhal, and would like to be your reliable business partner by serving you with our professional sense, experience and worldwide challenge in the machinery industry as a supplier of the complete machinery production, repairment and maintenance.

Our Machine Factories are integrated facilities that carry out the production, repairment and maintenance of the machinery needed by machine producers and manufacturing plants and have the capacity to meet the needs of heavy industry with their long-standing past, strong and experienced staff, since they were founded in 1933; which consist of 5 large machine factories and 1 Electromechanical Tools Factory (automation department), and all projects have been designed and executed completely by their own engineers and workers. Each of machinery factories are realizing all needs of total quality management systems (ISO 9001, ISO 14001, OHSAS 18001) in each step of the production processes, environmental management, logistics and personal management in a very high standards.

In addition to providing services to all kinds of manufacturing industries; large-scale machinery and facilities used in sugar and cement industry, units for thermal and hydroelectric power plants, pressure vessels for oil refineries and other industries, machines for iron and steel industries, various types of steel construction, industrial type steam boilers (10 t/h ~ 100 t/h), large pumps, fans, gearboxes, crushers, mills, oil pumps, large gearwheels, cranes, hoisting machines, waste water treatment plants and 95% of a complete sugar factory, as well as 85% of a cement factory can be produced in our Machine Factories.

In Machine Factories a 32 MW hydraulic turbine and generator were produced in cooperation with Turkish Electricity Administration, with the efforts of Turkish engineers, workers and using 100% domestic material which put into use in Hirfanlı Hydroelectric Power Plant.

We performed and carried out establishment of 30 sugar factories, one of which is abroad (Uzbekistan), 9 cement factories; production of pressure vessels, drums, column and heat exchangers; oil production pumps in Raman for Turkey Petroleum Corporation (TPAO), Diyarbakır Raki Factory belonging to the General Directorate of TEKEL; truck scales for Forest Management, 50 ton/hour capacity steam boiler for TUGSAŞ, AC-DC high and low voltage engine repairs, Ankara wind tunnel motor and motor drives. For Eti Bakır A.Ş. Murgul Management Office, an autogenous mill used in wet milling process of copper ore, which was previously being manufactured abroad, has been re-projected and produced as a new plant in 2008.

We therefore ask you to add our company to your list of reliable suppliers, and please do not hesitate to contact us if you have any demands, after checking out attached brochure to see our product range.

Hereby, we wish you success in your work.

Bahar CAN KILINÇ
